OBJECTIVE

Information Technology senior at New Jersey Institute of Technology seeking a full-time role in IT, cybersecurity, database administration, or web development. Experienced in full-stack web development, relational database design, and hardware, OS, and network troubleshooting.

EDUCATION

New Jersey Institute of Technology — Newark, NJ *Expected May 2027*
B.S., Information Technology | GPA: 3.4
Relevant Coursework: Database Management, System Administration, Network Security, Web Application

PROJECTS

Interactive Fan Experience Website | https://joshmathai.github.io/The-Career-Engineered-Portfolio/ *2026*

- Solo-designed and deployed a fully responsive website end-to-end using HTML, CSS, Node.js, and Vercel, from wireframes through production hosting
- Owned the complete project lifecycle independently — UI/UX design, back-end logic, GitHub version control, and CI-based cloud deployment
- Used AI coding assistants (e.g., GitHub Copilot) to accelerate scaffolding and debugging while writing and reviewing all production code manually

FitGear — Full-Stack E-Commerce Platform | github.com/joshuamathai/fitgear *2024*

- Built a gym-equipment marketplace with product catalog, shopping cart, and MySQL-backed checkout supporting multi-item transactions
- Implemented front-end UI, relational database schema, user session management, and end-to-end payment processing logic

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript, HTML/CSS, SQL, Node.js
Systems & Administration: Active Directory, Microsoft Entra ID, Microsoft 365, Linux
Tools & Platforms: Oracle, GitHub, VS Code
Networking: TCP/IP, DHCP, VPN, security best practices
Business & MIS: ERP concepts, IT project management, technology integration in business environments

EXPERIENCE

Customer Service Associate, The Home Depot *Apr 2024 – Present*

- Resolves customer order and product issues per shift using internal POS and inventory management systems
- Support customers on self-checkout technology and troubleshoot hardware/software issues on the sales floor in real time
- Named Employee of the Month for exceeding service, accuracy, and teamwork benchmarks

Independent PC Builder & IT Technician *Jan 2018 – Present*

- Designed, built, and configures custom desktop systems across gaming, workstation, and general-use tiers for individual clients
- Performed BIOS/UEFI configuration, hardware diagnostics, driver installation, and full OS deployment for Windows and macOS
- Troubleshoot desktop hardware, operating system, and connectivity issues to restore reliable system performance.

Young Group Representative, MGOCSM *Apr 2021 – August 2026*

- Manage logistics for community events, coordinating communications between youth leadership and stakeholders
